This condensed interim financial information for the three months period ended 31 March 2024 has been prepared in accordance with IAS 34, "Interim Financial Reporting" as adopted by the EU. The condensed interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2023, which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by EU. Except for the points described below, all the accounting policies applied in the preparation of this condensed interim financial information are consistent with those of the annual financial statements of the Bank for the year ended 31 December 2023.

Income tax

Income tax in the interim periods is accrued using the tax rate that would be applicable to expected total annual earnings.

New and amended standards and interpretations

The Bank's management do not believe that newly published standards, amendments and interpretations that are mandatory for the Group's and Bank's reporting periods beginning on or after 1 January 2024 will have a material impact on the Group's and Bank's financial statements, also there are no new standards, amendments and interpretations that are mandatory for the Group and the Bank with effect from 2024, and that would have a material impact on the Group's and the Bank's financial information.

Critical accounting estimates and judgements

The preparation of financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current event and actions, actual results ultimately may differ from those estimates. In preparing these condensed interim financial statements, the significant judgements made in applying Group's accounting policies and the key sources of estimation uncertainty were the same as those applied to the financial statements as at and for the year ended 31 December 2023, except for judgements and estimations used for calculation of impairment, which were revised to reflect the most recent economic forecasts. These judgements and estimates are described in more detail in Notes 1 and 10. It should be noted that at the moment of producing the financial reports there was no full clarity regarding further development scenarios of Russia invasion to Ukraine and uncertainties regarding further global, country and sector development trends existed, therefore there is a significant probability that actual results may deviate from the estimated.

These financial statements combine the consolidated financial statements for the Group and stand-alone financial statements of the Bank. Such format of reporting was adopted to ensure consistency of presentation with the format prescribed by the Bank of Lithuania and applied for statutory reporting.

No significant amounts of the Group's and the Bank's income or expenses are of a substantial seasonal nature.

NOTE 1

LOANS TO CUSTOMERS AND FINANCE LEASE RECEIVABLES

Credit risk is defined as the risk for the Group to incur losses due to the Group's customers' failure to fulfil their financial obligations towards the Group. Credit exposures arise principally in lending activities and it is the most significant risk in the Group's banking activities. There is also credit risk in investment activities that arise from debt securities and in the Group's asset portfolio as well as in the off-balance sheet financial instruments, such as loan commitments, guarantees and letters of credit.

The Bank regularly reviews its credit risk management policies which include lending policies, credit risk limit control, other credit risk mitigation measures as well as the internal control and internal audit of credit risk management.

The Bank takes risks only in the fields, which are well known to it and where it has long-term experience, trying to avoid excessive risk in transactions that can have negative influence to the big portion of shareholders' equity but seeks the sufficient profitability which, in terms of increasing competition, would ensure the stable Bank's position in the market and would increase the Bank's value. In assessing exposure to credit risk, the Bank adheres to the principle of prudence.

The aim of the Bank's credit risk management policy is to ensure that the conflict between interests of staff or structural units is avoided. With respect to provision of credits to clients, the principle stating that profit should not be earned at the expense of excessive credit risk is observed.

Maximum exposure to credit risk before collateral held or other credit enhancements:

Bank's investments in securitization are provided in several tranches to different investment layers bearing different risk levels. Part of investments made so far were made into layer bearing highest level of risk, therefore according to clauses in IFRS 9 applicable to contractually linked instruments, loans to SB Modernizavimo Fondas UAB are accounted at fair value through profit and loss and are disclosed in statement of financial position within line "Loans to customers". At initial recognition it was considered that fair value of these loans is equal to its acquisition value. NOTE 1

LOANS TO CUSTOMERS AND FINANCE LEASE RECEIVABLES (CONTINUED)

Loans are assigned to stages using the following principles (a deviation from these principles is allowed in the process of individual loan assessment based on contract-specific circumstances if it would result in more precise assessment of the risk of the contract):

Stage 1 loans: loans with no increase in credit risk observed.

Stage 2 loans: loans with an increase in credit risk observed. Main reasons for determining an increase in credit risk are: deterioration of borrower's financial status from the initial (this criteria is not applicable to the low credit risk loans, i.e. loans that have internal borrower's financial status assessment grades "very good" or "good" or investment grade credit ratings by external credit rating agencies), payment delay of over 30 days, and other objective criteria showing an increase in credit risk.

Stage 3 loans: defaulted loans. Main reasons for determining a default are: payment delay of over 90 days, bankruptcy of the borrower, termination of the contract, start of the foreclosure procedures and other objective criteria.

As lending activities are oriented to Lithuanian market, the Bank and the Group held no significant direct loan positions in Russia, Belarus and Ukraine. Potential risk assessment for separate sectors has not demonstrated economic sectors for which risk would be increased. Due to potential increase in credit risk the Bank has individually assessed clients with loans and finance lease contracts which have medium or high dependency from countries mentioned above through supply or sales chains or through shareholders structure and if increase in risk was determined credit stages for certain clients were reduced.

NOTE 5 SIGNIFICANT INFORMATION ON CHANGES IN OTHER LIABILITIES ITEMS

Due to other banks and financial institutions

On 28th June 2023 the Bank has repaid a EUR 150 million loan borrowed under the ECB's TLTRO III programme. After this repayment outstanding borrowing on the balance sheet under third series of the targeted longer-term refinancing operations (TLTRO-III) program of the European Central Bank amounted to EUR 479 million as at 31 March 2024. On 29 September 2021 Bank has borrowed additional EUR 479 million via ECB's latest TLTRO III.9 operation. Loan maturity date is on 25 September 2024 with early repayment option started on 29 June 2022. The Bank has not used early repayment option. Interest rate on TLTRO III was -0.5% from June 2020 to June 2021 and for banks meeting the lending thresholds, the interest rate can be as low as -1%. The Bank has met the lending thresholds during first two quarters of 2022 therefore has included the bonus on the special interest period in its effective interest recognition. Based on an internal assessment, part of the inflow of economic benefits from TLTRO-III borrowing with negative effective interest rate, which may be justified as market rate, was recognised within the income statement line "Interest income". The remainder is a benefit of the below-market rate of interest and was recognised within the income statement line "Other income" as a support or compensation for the fulfilment of the required obligations. Since 14th September 2022 interest rates for TLTRO-III borrowings are positive, TLTRO-III positive interest recorded in 2024 and 2023 income statement line "Interest expenses". Securities with a carrying value of EUR 520 345 thousand were placed as a collateral for these borrowings.

Special and lending funds

The special funds consist of the funds from the mandatory social and health insurance funds. The special funds should be returned to the institutions which have placed them upon the first requirement of the latter. The increase in special and lending funds from EUR 15,718 thousand in the beginning of the year to EUR 10,731 thousand in the end of the reporting period is attributable to routine fluctuations in these funds.

As environmental factors changed, assumptions and estimates used in probability of default (PD) estimations were changed. The scenarios used to calculate PDs were based on the latest available economic change scenarios published by institutions, Group's management assigned judgement-based probabilities to these scenarios. It should be noted that economic forecasts used took into account ongoing Russia's invasion to Ukraine but without knowing result scenario of it significant uncertainties existed on how it will impact further global, country and sectors development trends. Due to such circumstances there is a significant probability that actual results may deviate from the estimated.

NOTE 13

LIQUIDITY, MARKET AND OPERATIONAL RISKS

Liquidity risk

Liquidity risk means the risk that the Bank is unable to meet its financial obligations in time or that it will not manage to receive financial resources during a short time by borrowing or selling the assets.

Liquidity risk management process

The liquidity risk management depends on the Bank's ability to cover the cash shortage by borrowing from the market and the liquidity of the market itself. Liquidity risk management is regulated by the Procedures for Liquidity Risk Management approved by the Board of the Bank. The management of the current and non-current liquidity risk is distinguished in the mentioned procedures. The current liquidity is based on the control of the incoming and outgoing cash flow. The non-current liquidity is managed on the limit system basis.

Tables below present the assets and liabilities according to their remaining maturity defined in the agreements. However, actual maturity of the particular types of assets and liabilities may be longer as, for example a portion of loans and deposits is extended and thus the real repayment terms of short-term loans and demand deposits move forward.

The structure of the Group's assets and liabilities by maturity as at 31 March 2024 was as follows:

Operational risk

Operational risk is the risk of experiencing losses due to improper or unimplemented internal control processes, employee errors and/or illegal actions, disruptions in information system operations, or the influence of external events. Operational risk, unlike other types of risks (credit, market, liquidity), is not intentionally assumed with the expectation of gaining benefits; it arises naturally in the course of the Bank's activities.

In the year 2023, the Bank continued to enhance the operational and reputational risk management systems, as well as incident recording systems for the Bank and its Group companies. Starting from 1 December 1 2023, operational risk incidents are recorded in the Service Bank. The decision to migrate to the Service bank was made for the convenience of JIRA functionalities and a unified registration location. From now on, operational risk incidents in the Service bank can be recorded by all employees of the Bank, SB lizingas UAB, Life Insurance SB Draudimas UAB and SB Asset Management UAB. E-learning modules on Operational Risk were prepared at the beginning of 2023.

On October 25-26, 2023, a Comprehensive Testing was conducted in the Bank, showing that the Business Continuity Plans and processes in place are suitable, with no significant deficiencies identified in ensuring business continuity.

Throughout this year, significant attention will continue to be given to Business Continuity Management, Risk Management, and monitoring of Critical Outsourced Services, as well as strengthening the operational and reputational risk culture across the entire Bank Group.

NOTE 14

FINANCIAL ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

Types of inputs used in valuation techniques determine the following fair value hierarchy:

- Level I – Quoted prices (unadjusted) or public price quotations in active markets for identical assets or liabilities;
- Level II – Inputs other than quoted prices included within Level I that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices);
- Level III – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

During three months period ended 31 March 2024 the process of fair value measurement did not change significantly as compared to the process described in annual financial statements for the year 2023. For the valuation of financial assets and liabilities purposes, estimates, valuation techniques and inputs used to develop those measurements have not changed significantly if compared to those described in annual financial statements for the year 2023.

² Preliminary data

Overview of Business Segments

Corporate Client Segment

Demand for business finance is showing positive trends, with new contract volumes rising by 33% to €208 million in Q1, almost on a par with the same period last year. The business loan portfolio grew by 5% (up by €80 million) to over €1.6 billion.

The €200 million SB Modernisation Fund 2, set up to finance the renovation of multi-apartment buildings, has been launched. The multi-apartment renovation fund will finance the modernization of up to 300 multi-apartment buildings in Lithuania. Around 10,000 households will benefit from the changes. The first such fund, the €275 million SB Modernisation Fund, was established in 2022, has been successfully disbursed, and has already financed the renovation of 394 multi-apartment buildings.

Private Client Segment

In order to increase its competitiveness, Šiaulių Bankas is initiating an operational transformation process, during which the branch network will transition into a sales-oriented organisation. This transformation will encompass not only the development of sales staff competencies and motivation but also the reduction of administrative burden by centralising administrative functions, thereby freeing up valuable branch staff time for sales expansion. Streamlined operations will drive future growth, elevating sales per FTE and better serving our customers.

Šiaulių Bankas has successfully launched Apple Pay, which has been enthusiastically received by customers. This initiative continues to contribute successfully to the bank's digitalisation, increasing customer satisfaction, engagement, and loyalty.

Investment Client Segment

The main priority for Q1 of this year was the development of the bond issuance and distribution service for both investing clients and issuers. We have started working with a new segment, institutional investors, which will further consolidate the bank's leadership in capital markets. All customers who wish to receive up-to-date information on the bonds distributed by the bank can now subscribe to the Bond Newsletter. During the period under review, customers have invested more than €60 million in 13 corporate bond placements organised by the bank. The assets under custody held by the bank at the end of March amounted to €1.8 billion.

At the end of Q1 2024, assets under management by SB Asset Management, the asset management company of Šiaulių Bankas Group, exceeded €1.26 billion, growing by €90 million in the first three months of the year. Most of this increase was driven by the return on investments of the assets under management, generating profits for clients of over €76 million. Pillar II pension funds alone returned 6.9% in Q1 of the year and have maintained a very high average annual return of 9.8% since the pension reform in 2019.

The documents for the establishment of the third Alternative Investment Fund are being finalised, with the aim of making the fund available to clients later this quarter. This fund will differ from the first two alternative investment funds by offering the possibility to both increase and decrease investments during the life of the fund.

REGARDING EXTERNAL ENVIRONMENT FACTORS

The Bank monitors the tense geopolitical situation in order to properly and timely assess and identify the potential impact of Russia's invasion of Ukraine on the Bank's operations and the quality of its portfolio due to the risks it poses to clients. The Bank has no operations in Russia, Belarus or Ukraine and does not have significant direct exposures in these countries. The Bank considers the secondary risk of direct insolvency of clients operating in Lithuania due to the geopolitical situation to be low: the Bank's largest clients are aware of the threats, the number of clients dependent on business relations with Ukraine and Russia is low, and clients with business relations in the countries mentioned above are reducing their dependence of their income on business transactions. To identify in a timely manner a potential increase in the risk of its clients, the Bank applies the procedures set out in the Bank's internal regulations, records Early Warning Indicators (EWI) for the impact of the geopolitical situation on the clients that have a moderate or greater dependence on the aforementioned countries through their supply or sales chains, or through their shareholding structure, and, in the event of a potentially significant risk, puts the client on the Watch List and implements enhanced monitoring for these clients, and approves action plans for the mitigation of risk. The greatest uncertainties and potential negative impacts arise from tertiary effects, i.e., the impact of Russia's invasion of Ukraine on the overall state of the economy. The Bank uses scenario assessments and stress testing to assess these impacts. These assessments indicate that the Bank's capital position is strong and that the Bank would be able to withstand significant shocks related to economic downturns.

The increased monitoring is not limited to credit risk, but also includes a stronger monitoring of the bank's liquidity position (except for the increased cash withdrawals a few days after the start of the invasion, there were no negative trends related to the invasion), increased focus on business continuity and IT security (business continuity plans have been updated with a number of additional scenarios, cybersecurity status is constantly being monitored, additional cyber-protection measures have been implemented, and testing of measures and plans is ongoing). Also, due to the rapidly changing situation and the introduction of new sanction packages, the processes and procedures for complying with the sanctions for clients and payments are under considerable scrutiny, which may in some cases lead to longer process time.

The Russian invasion of Ukraine may further contribute to increased market volatility. The Bank has no direct investments (securities or other financial instruments) in Russia, Belarus or Ukraine. The Bank has no or close to zero open currency exposure in these countries.

The Bank is closely monitoring the situation regarding problems of some US and Swiss banks. The Bank has no direct positions in these credit institutions and does not notice any material second or third order effects to Bank's activities. Events unfolding in the Middle East also do not have a material direct impact on Bank's activities.
